# Our Technology

**CODERKUBE  
TECHNOLOGIES**

# Why Outsource Us?

- Access to latest technology & tools
- Scalable solutions to match growth
- Faster project delivery & time-to-market
- Focus on quality with zero compromise
- Risk management & compliance assurance
- Dedicated team for every project
- Proven expertise across industries
- Transparent communication & reporting
- Flexible engagement models (hourly/monthly/  
project-based)
- Enhanced customer satisfaction

# Critical Assumptions

## Our Availability

The services offered are available to customers during Regular business hours. In case of anything urgent issues or bugs, it can be extended.

## Customer Responsibilities

Provide well documented software requirements to the Software Development team in order to facilitate the appropriate scoping, design, development, testing and implementation activities.

A dedicated team member from client would be assigned during the service agreement and one person would be made the coordinator, who would be a single point contact for CoderKube team and will be the final authority in providing information and approving the deliverables.

# Our Clients

# What Our Client Says

**Ashley Musgrave**

This is a great company that I have kept using over the last 5 years because they are reliable, deliver what they say they will and have always been excellent value. I think they have grown a lot over the last few years which is no surprise as they were solid from the start and I guess lots of other people have also had the same positive experience, judging by their growth and success. Recommended.

**Maize (Alpine Marketing)**

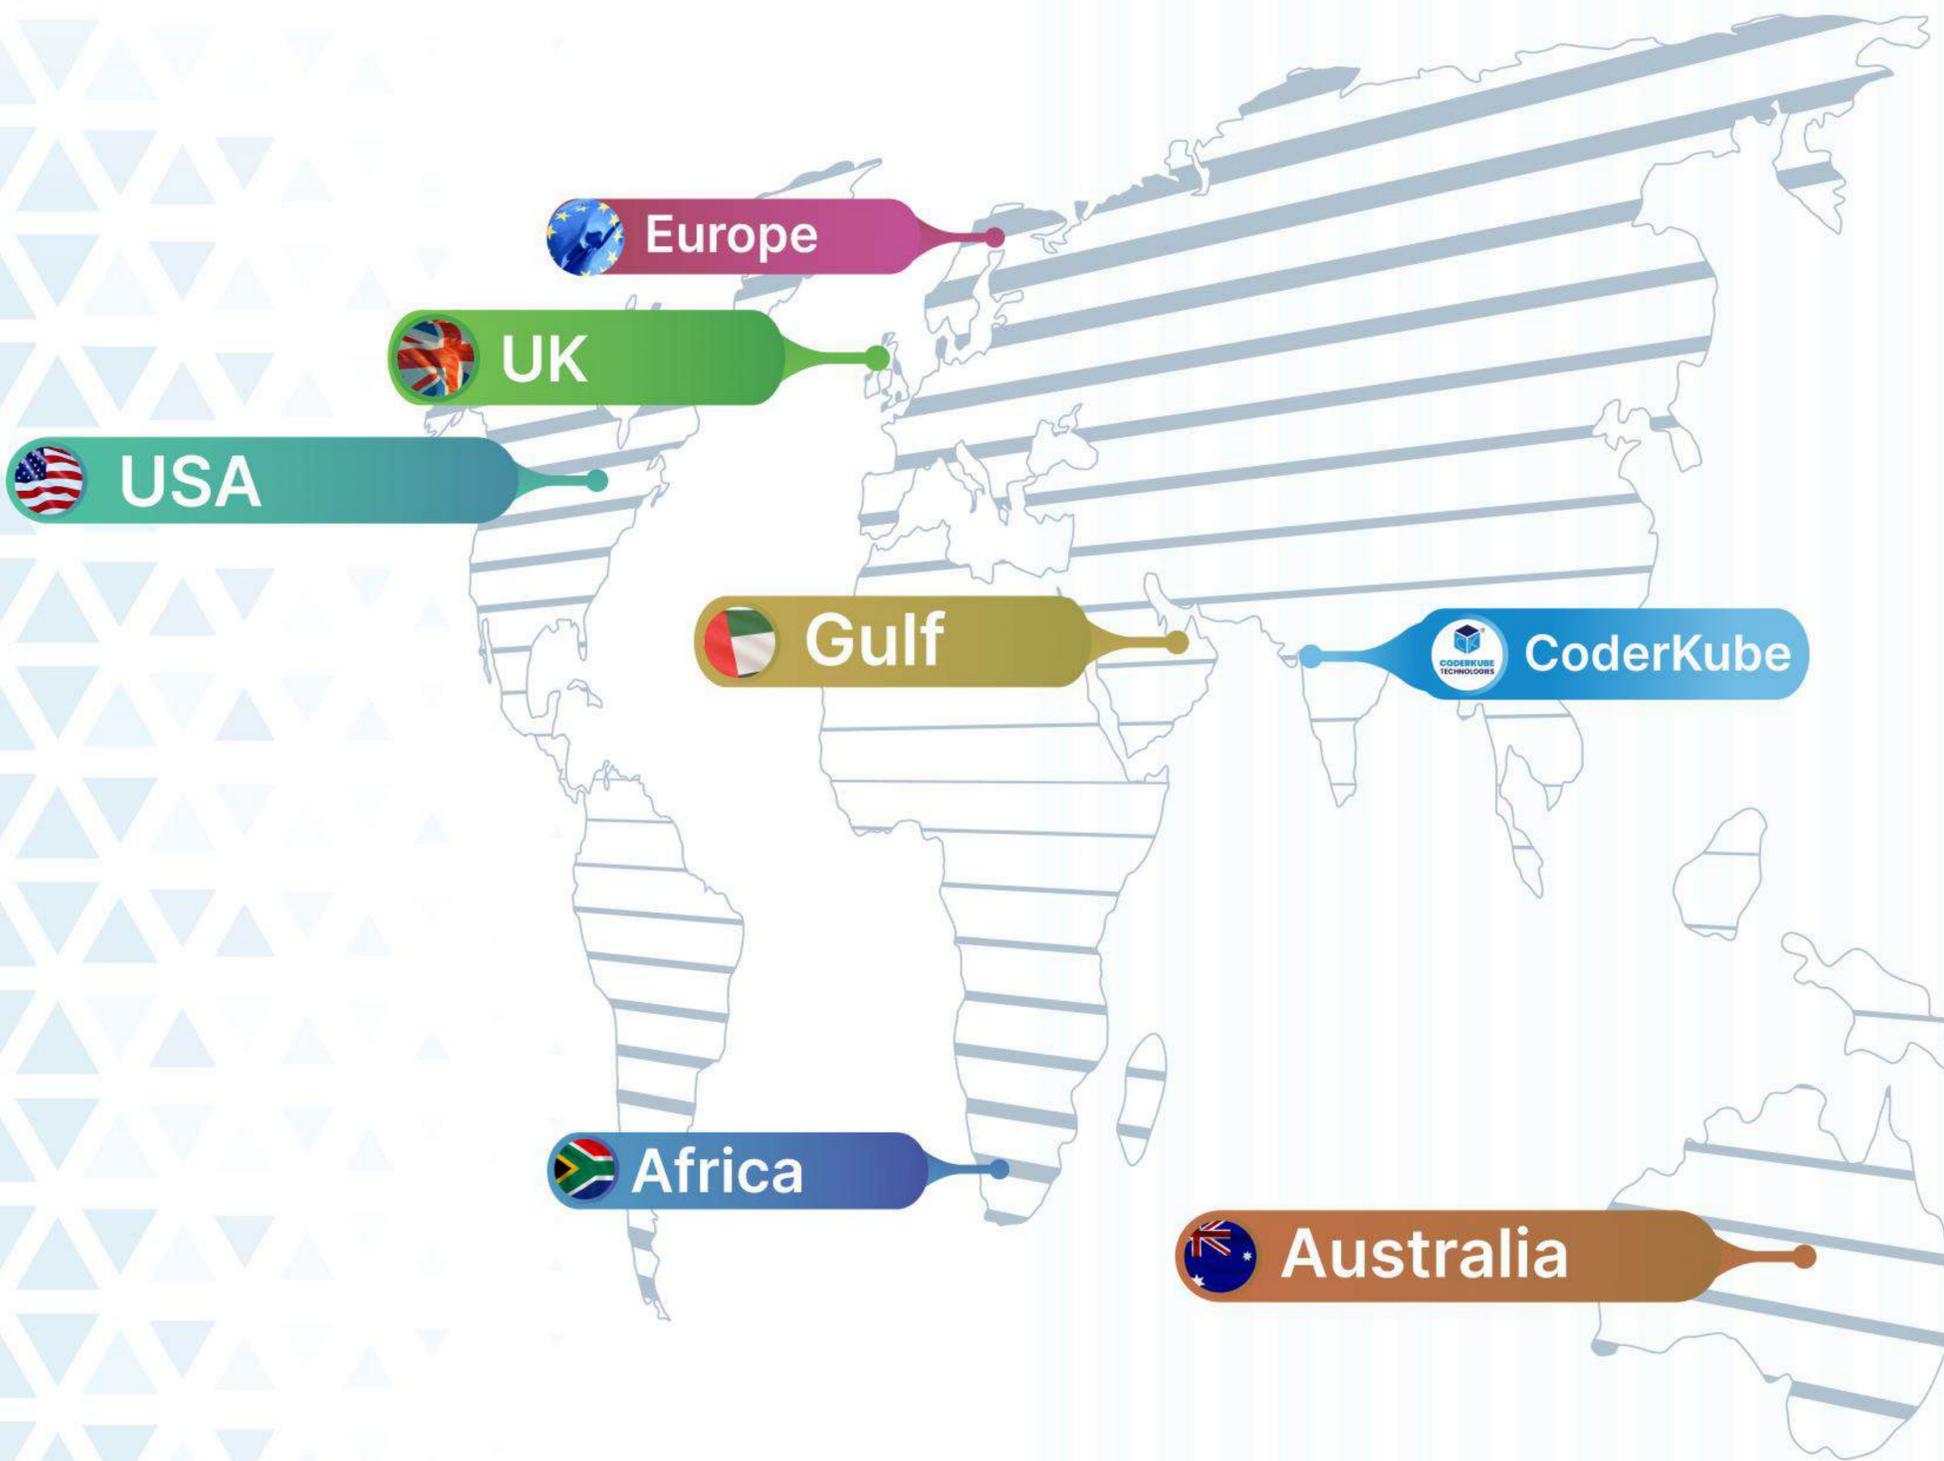

We have worked with CoderKube for several years now and are absolutely delighted with their services. We run busy offices in London and Austria and needed a company that would work fast and takes the initiative to help solve problems. They do a fabulous job and I would highly recommend you try them!

**Tim Ranscombe (Tims Digital)**

Great company to work with. They have supported a number of projects now and I can highly recommend them. Their attention to detail, excellent communication, and flexibility makes them stand out as a developer.
